**In-Office Accelerated
Whitening System**

SIMPLE

The LaserSmile™ whitening procedure is simple and hassle-free. In just one visit to your dentist's office, you can sit back, relax, and walk out with the whitest, brightest smile in **as little as 40 minutes.**

1. Gingival protection is placed to protect your gums.
2. LaserSmile gel is professionally applied.
3. Gel is laser-activated in 15-second intervals and repeated as necessary.
4. Gel is rinsed off and gum protection is removed. You are now ready to show off your Laser White Smile!

STATE-OF-THE-ART

The LaserSmile™ uses the latest, most advanced state-of-the-art **TCIA™** (Target Chromophore In-phase Accelerated-activation) whitening technology. Utilizing the laser's unique monochromatic characteristics, along with a proprietary wavelength-specific photon activated gel, the LaserSmile™ system provides **gentle, safe, fast and effective whitening for you in just one visit!**

Dramatically Whiter Teeth In Just One Visit

SAFE

The primary ingredient in the LaserSmile™ gel has been used in teeth whitening for over 100 years and is recognized as a safe and effective ingredient by dental community.

The dramatically shorter treatment time avoids excess heat & sensitivity common to other whitening devices, promoting your comfort and safety.

In addition, the LaserSmile™ procedure is performed only by licensed dentists and dental professionals to further ensure your safety.

MAINTAINING YOUR SMILE

After the LaserSmile™ treatment, you should resume your normal dental hygiene routine brushing your teeth at least twice a day, and flossing. However, we do recommend that you keep the consumption of staining food, such as tea, coffee, red wine, etc., to a minimum to ensure your **long lasting laser white smile.**

How white will my teeth get?

LaserSmile™ has been able to achieve dramatic results in most patients. Your results may vary depending on the type of stain, thickness of enamel, your age and personal habits. Ask your dentist how much whiter your teeth can be.

Does it work on caps, veneers or bonds?

While results may vary, whitening procedures are generally not designed for caps, veneers or bonds. Consult your LaserSmile™ dentist to determine your treatment expectation.

How long does it last?

LaserSmile™ whitening results can last for years assuming good hygiene and reasonable exposure to staining foods and beverages. However, actual results may vary due to individual differences in tooth structure and personal habits.

Is this procedure for everyone?

Basically, anyone who wants his/her teeth whitened can benefit from the LaserSmile™ procedure, except people who are allergic to the ingredients in the gel. Also, if you are pregnant, breast-feeding, or have any extraordinary conditions, please let your dentist know ahead of time.
